ThenDesign Architecture (TDA)

Project Architect (Cleveland, OH)

What we need: We are seeking Architects with experience in K-12, as well as, civic/community projects. Developing projects from programming, conceptual, schematic, and design development through construction documentation and specification. Candidates must have the ability to accomplish multiple tasks and deadlines, a willingness to mentor new professionals, and a passion for architecture. Exceptional interpersonal and project management skills are required. Degree in architecture from an accredited university; ten or more years of experience in the industry and proficient Revit software skills are preferred.

What you get: Company culture that allows you to direct your career path. Collaborative work as a team and client engagement. The successful applicant(s) will be working with our team of incredibly talented, energetic and intelligent staff members in developing high performance design teams. The best software tools and technical support are provided. A learning environment where you can expect high responsibility to gain a wide range of experience.
