

Save The Date! October 6th at 6pm, VCE & Chico Builder's Exchange will be hosting a fundraiser for VCE's newest non- profit, The Valley Contractors Workforce Foundation. Our trainer, Bill, is working hard to expand MCT's outreach and has now assisted several different programs and individual's.

The Hands on Tools Mobile Construction Training Program, or MCT for short, is an amazing opportunity for those interested in the construction trade. MCT has worked with middle school aged children to young adults in hopes they find the passion for construction like we do, and seek a related career. **So far, MCT has provided 4 jobs local to the North State for our young adult volunteers.**

The invitation to our fundraiser is listed below. Buy a table of 8 today to enjoy the night with good company and take a chance at our many auction items! Individual tickets and drink tickets are available.

If you would like to donate an auction item, please contact our Member Service Coordinator, Daelyn, at daelyn@vceonline.com

Another day with Mobile Construction Training

On 8/30/22, MCT assisted the Tiny Pines Foundation on another wonderful tiny home! Trainer Bill and Executive Director Amy worked hard on the start of the foundation.

Stay tuned for more updates on this project by visiting the VCE Facebook page and website, or the MCT's Instagram page.

We want thank Rohrer Construction, NVCSS, Doran Leaf Contracting and all our volunteers who came all the way from Cottonwood.

Though the Tiny Homes may be small, they are stable, county approved, and are long term housing for those still displaced with no formative way to rebuild.

TRADES DAY

A DAY FOR CONSTRUCTION
CAREER EXPLORATION

INVEST IN THE NEXT GENERATION OF THE CONSTRUCTION INDUSTRY!

 **CIEFoundation**

NOV 08, 2022
8:30 AM - 12:30 PM
SILVER DOLLAR FAIRGROUNDS

Schools, youth groups & individual students are invited to register for a two hour block starting from 8:30am until 12:30pm.

Students will go through a five minute safety tailgate talk upon their arrival before they enter the exhibition halls.

In Partnership With:

 **vce** valley contractors exchange

Trades day is designed to introduce high school youth to a variety of career opportunities in the industry including general construction, sub-contracting, suppliers, heavy equipment, engineering, as well as other related trades.

We encourage trade, industry and post-secondary education, and training program partners to participate and inspire local students to build a career in construction. Bring a hands-on activity for students to engage in that will allow students to learn how to build something with their hands, how to use a tool or piece of equipment and explore all the industry has to offer. Take part in an exciting opportunity to pass along the things that excite you about your work.

**FOR MORE INFORMATION PLEASE VISIT TRADESDAY.ORG
OR CONTACT BRITTANY ALBAUGH AT BALBAUGH@CIE.FOUNDATION OR 916.465.8341.**

&
Surveys**

We will also discuss our website content, forms and handouts, and future modifications to our site. Please take a few minutes to visit us at <https://www.townofparadise.com/building> and provide feedback as to how we can improve.

Please RSVP by Tuesday September 6, ATennin@townofparadise.com Include the number of attendees and any other topics you would like to see addressed.

Please come join us!

AB 1078 provides a solar exception currently under AB 178 for fire rebuilds until 1/1/2024 and has been expanded to include Bear and Dixie fires.

An act to amend Section 25402.13 of, and to add and repeal Section 25402.13.5 of, the Public Resources Code, relating to energy.

LEGISLATIVE CONUSEL'S DIGEST

AB 1078, Patterson. Energy: building standards: photovoltaic requirements.

Existing law authorizes the State Energy Resources Conservation and Development Commission to prescribe, by regulation, energy efficiency standards, including appliance efficiency standards. Pursuant to this authority, the commission has established regulations requiring solar-ready buildings and for the installation of photovoltaic systems meeting certain requirements for low-rise residential buildings built on or after January 1, 2020.

Existing law, until January 1, 2023, specifies that residential construction intended to repair, restore, or replace a residential building damaged or destroyed as a result of a disaster in an area in which a state of emergency has been proclaimed by the Governor before January 1, 2020, is required to comply with the photovoltaic requirements, if any, that were in effect at the time the damaged or destroyed residential building was originally constructed and is not required to comply with any additional or conflicting photovoltaic requirements in effect at the time of repair, restoration, or replacement. Existing law provides that this provision applies if certain requirements are met with respect to the owner's income and insurance coverage and the location and square footage of the construction.

This bill would extend the operation of the above-described exemption from the commission's requirements for the installation of photovoltaic systems until January 1, 2024, and extend the exemption to residential buildings damaged or destroyed as a result of a disaster declared during the 2020 calendar year. The bill would require the commission to collect data on the use and application of the exemption from local permitting agencies and, on or before March 1, 2023, and again on or before March 1, 2024, to prepare and submit a report to the relevant policy committees of the 97 AB 1078 — 2 — Legislature concerning the exemption, as provided. Because a local agency would be required to determine whether those requirements are met, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 25402.13 of the Public Resources Code is amended to read:

25402.13. (a) Notwithstanding other laws, residential construction intended to repair, restore, or replace a residential building damaged or destroyed as a result of a disaster in an area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code shall comply with requirements regarding photovoltaic systems pursuant to regulations prescribed pursuant to subdivisions (a) and (b) of Section 25402, if any, that were in effect at the time the damaged or destroyed residential building was originally constructed and shall not be required to comply with any additional or conflicting photovoltaic system requirements in effect at the time of repair, restoration, or replacement.

(b) This section does not apply to emergencies proclaimed by the Governor on and after January 1, 2021.

(c) This section only applies when one or more of the following conditions are met: (

1) The income of the owner of the residential building is at or below the median income for the county in which the residential building is located as determined by the Department of Housing and Community Development state income limits.

(2) The construction does not exceed the square footage of the property at the time it was damaged.

(3) The new construction is located on the site of the home that was damaged. 97 — 3 — AB 1078

(4) The owner of the residential building did not have code upgrade insurance at the time the property was damaged.

(d) This section shall become inoperative on January 1, 2024, and, as of January 1, 2025, is repealed. SEC. 2. Section 25402.13.5 is added to the Public Resources Code, to read:

25402.13.5.

(a) The commission shall collect data, to the extent possible, on the use and application of Section 25402.13 from local permitting agencies.

(b) Notwithstanding Section 10231.5 of the Government Code, on or before March 1, 2023, and on or before March 1, 2024, the commission shall prepare and submit a report to the relevant policy committees of the Legislature on the use and application of Section 25402.13 from the data collected pursuant to subdivision (a).

(c) This section shall remain in effect only until January 1, 2025, and as of that date is repealed.

SEC. 3. No reimbursement is required by this act pursuant to Section 6 of Article XIIIIB of the California Constitution because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act, within the meaning of Section 17556 of the Government Code. 9

AB 2139—Template Floor Plans for Rebuilding Structures Destroyed in a Declared Emergency.

AB 2139, has passed the legislature, VCE was proud to advocate and testify for this important piece of legislation. It reads as follows; "This bill allows property owners to use certain template floor plans for rebuilding structures destroyed in a declared emergency (prior to 1/1/2020) without regard to subsequent building standards changes". Let's put it into language we can actually understand..... Mastered plans filed with your local building departments aren't subject to code updates if they are being used to rebuild residences lost in a fire or other natural disaster. These include master plans like the ones in Rebuild Paradise Foundations Residential Floorplan Library as well as any that your company has mastered with Butte County or the Town of Paradise. While these exceptions are subject to approval by our local building officials, VCE will advocate with our local building departments to make sure rebuilding safely is not jeopardized. However, the new Title 24 requirements that go into effect on 1/1/2023, we believe, should not be required on mastered plans. If you have a plan you plan to build to at least 3 times, get it mastered by the end of the year to take advantage of this exception!

Assembly Bill No. 2139

CHAPTER 184

An act to add and repeal Section 18941.12 of the Health and Safety Code, relating to building standards.

[Approved by Governor August 26, 2022. Filed with Secretary of State August 26, 2022.]

Legislative counsel's digest

AB 2139, Gallagher. Building standards: local rebuilding plans: state of emergency.

Existing law establishes a California Building Standards Commission in the Government Operations Agency. Existing law requires only those building standards approved by the commission, and that are effective at the local level at the time an application for a building permit is submitted, to apply to the plans and specifications for, and to the construction performed under, that building permit, except as provided, including for a city or county that has been subject to an emergency proclaimed pursuant to the California Emergency Services Act (CESA).

Existing law, the CESA, among other things, authorizes the Governor to proclaim a state of emergency in an area affected or likely to be affected thereby if specified conditions exist and either (1) specified local officials request the Governor to so declare or (2) the Governor determines that local authority is inadequate to cope with the emergency.

This bill would, until January 1, 2029, and notwithstanding any subsequent updates to building standards approved by the commission, permit an individual submitting a proposed development plan for a residential development to utilize, and require a local agency to allow the utilization of, a template floor plan if certain conditions are met, including that the proposed new development is located on the same parcel that contained a residential building that was damaged or destroyed, prior to January 1, 2020, as a result of a disaster in an area for which a state of emergency was proclaimed by the Governor pursuant to the CESA. By imposing additional duties on local agencies, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 18941.12 is added to the Health and Safety Code, to read:

18941.12. (a) Notwithstanding any subsequent updates to building standards approved by the commission pursuant to this chapter, an individual submitting a proposed development plan for a residential development may utilize, and a local agency shall allow the utilization of, a template floor plan if all of the following conditions are met:

- (1) For use of a template floor plan on or after January 1, 2023, and before July 1, 2024, all of the following conditions:
 - (A) The template floor plan was approved, between January 1, 2020, and December 31, 2022, by the local agency that oversees development approvals where the proposed residential development is located and the plan complied with all building standards in effect at the time.
 - (B) The proposed new development is located on the same parcel that contained a residential building that was damaged or destroyed, prior to January 1, 2020, as a result of a disaster in an area for which a state of emergency was proclaimed by the Governor pursuant to the California Emergency Services Act (Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code).

(C) The owner of the destroyed or damaged residential building did not have code upgrade insurance at the time the building was damaged or destroyed.

(D) The proposed new residential development will be used for owner-occupancy and is not intended to be used as a rental or vacation property.

(E) The template floor plan is being used no more than six years after the date it was approved.

(2) For use of a template floor plan on or after July 1, 2024, both of the following conditions:

(A) All of the conditions in paragraph (1).

(B) The local agency has approved, following every issuance of new state building standards, a resolution that includes findings that the continued use of the template floor plan without regard to subsequent changes to building standards does not pose a significant risk to the health and safety of the building occupants or the community.

(b) This section shall remain in effect only until January 1, 2029, and as of that date is repealed.

SEC. 2. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act, within the meaning of Section 17556 of the Government Code.

Federal Funding for Disaster Relief

Northern California has witnessed devastating destruction from wildfires in recent years. In addition to working to change federal forestry policy to reduce the risk and severity of wildfires, I'm working hard in Congress to secure disaster recovery and rebuilding aid to the North State. This last week I announced five major disaster recovery awards totaling over \$312.8 million to our area. These awards – over \$1 billion total to fund unmet needs to local cities and counties with \$317 million set aside for infrastructure projects – were designated by Congress in 2018 and 2019 and signed into law by President Trump.

The funds appropriated were delivered to the State of California to be used under the Community Development Block Grant (CDBG) program from the California Department of Housing and Community Development. Although it has taken too long from the time I helped allocated these funds to when the recipients actually received their awards due to the money having to go through the state first, I am happy that they are finally receiving their Congressional approved aid. I also want to thank State Senator Jim Nielsen and Assemblyman James Gallagher for their help in ushering the funds through the state to ensure they get to the recipients.

The Town of Paradise received \$199,592,753.75, Butte County received \$72,722,697.61, and Chico received \$12,388,409.65 to assist in recovery from the Camp Fire. The City of Redding was awarded \$22,563,043.51 and the City of Shasta Lake was awarded \$6,326,184.69 to assist in recovery from the Carr Fire. California estimates that the Camp and Carr fires caused nearly \$23 billion in damages, with the North State needing roughly \$7.2 billion more to help with recovery efforts. In total, California received \$1,017,399,000 from the Community Development Block Grant to go towards the \$7.2 billion left that's needed. Although there is still a ways to go, these funds will help greatly.

These federal funds were delivered through the state so our local governments could have maximum flexibility in their use for recovery, including infrastructure projects. The money can be used for any eligible recovery or infrastructure project including fire mitigation, water control facilities, public utilities, or construction of roads and bridges.

MEETING ANNOUNCEMENT

For All Building Industry Professionals

The Department of Development Services (DDS), Building Division invites you to attend a meeting we are having:

“Building Stakeholder’s Meeting”

WHEN: Wednesday September 28, 2022
WHERE: 7 County Center Drive
Oroville, CA 95965 Development Services Training Room
Or Online: <https://bcdds.net/Stakeholders>
Event (Meeting Number): 2553 605 4561
Event Password: Stake
Phone number: (408)418-9388, Access Code: 2553 605 4561
TIME: 3:00- 5:00pm

The purpose of these meetings are to discuss issues or concerns with the Building Division, new codes or policies, new forms/handouts, catch you up on any changes we've made, and to hear any ideas that you have.

We will be discussing:

- Staffing and Recruitment Updates
- New Codes Coming January 1, 2023
- CRC WUI Updates

Please take a few minutes to visit us at <http://www.buttecounty.net/dds> and provide feedback as to how we can improve our website.

Follow us on Twitter [@ButteBuilding](#)
