HANDICAPPING STATEMENT FROM PHIL SMITH

In response to a disproportionately high success rate of Irish runners in British handicaps – which reached as high as 18% in 2004/05 compared to a British strike rate of 9.5% - it was agreed that the British handicappers should keep performance figures for Irish Jump races.

This is in no way a comment on our colleagues in Ireland. It is purely for consistency purposes – handicapping will always be subjective and it makes sense for every runner in handicaps in Britain to be assessed by British handicappers using identical methodology.

Since switching approaches the strike rate of British and Irish runners have levelled out with the Irish strike rate remaining marginally higher at 11% compared to 10% for British runners.

We have also monitored success rates at the four major festivals since 2006, where the British strike rate is 250 winners from 5,199 runners at 4.8%, compared to 154 Irish winners from 2,990 runners at 5.2%.

The Jump Handicappers are confident that based on these figures there is no semblance of any anti-Irish bias and that keeping our own Irish performance figures has given our handicaps greater equality and fairness.
