

CAPABILITY STATEMENT

Hovair Systems Mfg. Inc. is a "Heavy Load Moving" equipment manufacturer. Our technology centers around floating heavy equipment and machinery on air. Thus reducing the effective weight of any object to a ratio of 1 tenth of 1% (10Lbs. of force to move 10,000 Lbs. of mass). Our solutions are environmentally friendly, support Lean and Leed manufacturing initiatives, and are a major contributor to "safe facility" goals and mandates. We have **ZERO** accidents or injuries using our products in almost 50 years in the industry. Our experience, knowledge, and customer support separates us from the competition.

Air Bearing Technology

- Core Products
- Air Skates
- Vehicle Turntables
- Industrial Turntables
- HD Transporters
- Air Jacks
- Custom designed solutions
- Air Sleds
- Air Lifting Bags

Quality Culture

- Core Competencies
- Experienced Design Engineers
- Quality Products
- Quality Process
- Quality People
- Quality Customer Service

After Sale Value

- Value Added Services
- Customer Portal
- Supplier/Client Dashboard
- Product Metrics / Business Intelligence
- Customer Resource Management
- Life time warranty

Our solutions have ranged from building transporter systems for NASA'S Saturn 5 Rocket boosters, to making work platforms mobile so Boeing employees can more easily build planes, to building transporters for Lockheed Martin to move F-16 parts.
