Take an early morning stroll or an afternoon walk with the interpretive staff of the County Parks Division as we look for the spring migrants and local breeding birds of the county. This is a great chance to brush up on your song identification skills. Binoculars are available to borrow.

A medium-sized telescope should be able to show you some of the details in Jupiter's cloud bands and see Jupiter's four largest moons, appearing as bright dots on either side of the planet. Plus, the Eta Aquarids, an above average meteor shower, will be occurring and the dark sky will offer a great chance to view the meteors and the constellations.
