

BE ONE OF THE FIRST HOSPITALITY SMEs IN THE UK TO TEST A NEW GOVERNMENT BACKED ENERGY MANAGEMENT APP

KEY FEATURES

- Daily energy performance trends correlated to room nights and/or food covers
- Trends in utility costs are automatically calculated
- Quick wins - recommendations on how to save energy
- Opportunity to record implemented actions and track impact
- Alerts of spikes in consumption - allowing for real time action

KEY BENEFITS

- Tailored to hospitality operations
- Straightforward and simple to use
- Provides actionable insight on how to achieve energy, emission and cost savings
- Complex, high-frequency data translated into relevant, simple and actionable information
- Provides signalling visuals to make the performance trends instantly clear

Considerate Hoteliers – a specialist company that helps hospitality businesses operate responsibly – has been selected by the Department of Business, Energy and Industrial Strategy (BEIS) to develop an energy management app, specifically for the UK SME hospitality market.

Considerate Hoteliers has extensive expertise in providing energy management advice for the sector.

WOULD YOU LIKE TO TEST THE CH APP FOR FREE AND CONTRIBUTE TO ITS DEVELOPMENT, WHILST IDENTIFYING POTENTIAL COST SAVINGS?

If you are one of the first 10 UK based hospitality businesses to respond, not only will your business benefit during the testing phase, but you will also get a 12-month free subscription to the CH App when it launches. Please note you must meet our eligibility criteria* to participate.

To participate in the testing of the CH App, or to get more information, please get in touch.

* To be eligible to participate in the testing of the CH App you must be a UK based hospitality industry SME with less than 250 employees and an annual turnover below £50 million. You must have a SMETS type smart meter installed at the property or be willing to request its installation. SMETS meters have a digital display, might have a "HAN" and "WAN" label below flashing lights, and might come with a remote display device (see image above as an example of a SMETS meter). Please note that an AMR meter is not necessarily a smart SMETS meter. For further guidance, please get in touch.
