

A Community Conversation on Treating Opioid Dependency

There's a statewide push to create more opioid treatment options for people. The goal is to reach people who don't have health insurance. We also want to reach people who have health insurance that doesn't cover the substance use treatments they need.

Mercy Care Plan and Mercy Maricopa Integrated Care want to invite you to a conversation about where we should focus our efforts and funding. We want to hear from our neighbors, providers and first responders. We want to know what the greatest needs are in addressing opioid abuse.

- What should treatment opportunities should look like?
- Where are the gaps in existing services?
- What are the barriers to access services?
- Which treatment options should be expanded?
- What can we do to better support your work with individuals experiencing opioid use issues?

Join us and share your voice. We want to hear from you. We'll have light refreshments and Spanish interpretation will be available.

When

Friday, February 16
2 – 4 p.m.

Where

RI International
2701 N. 16th St. in Phoenix

There are 21 Medication-Assisted Treatment (MAT) locations in Mercy Maricopa's network where individuals can get help with their opioid use dependence. To get more information, you can call Mercy Maricopa Member Services at **602-586-1841** or toll-free **1-800-564-5465**; (TTY/TDD) **711**. They're available 24/7.
