

**Effective 1/1/2018, SentryLock will be establishing  
minimum password requirements.**

*The number one method hackers use to gain access to someone else's online account is to attack less secure passwords. SentryLock is making our system even more secure by requiring more robust passwords.*

***As of 1/1/2018, SentryLock will require a minimum password standard of six (6) characters, with one (1) upper case letter, one (1) lower case letter, and one (1) numeric value.***

*Customers will be able to update their passwords to the new requirements in the SentrySmart™ App or the SentryLock Lockbox web site. Thank you for your cooperation as we implement these changes.*
