

RAAC Training Institute presents...

Dr. Lori Ernsperger, PhD., BCBA-D

New Date: Thursday, October 6, 8:00am-3:30pm

Reduced Student Registration Fee

Morning Session Description:

“Why Are They Doing That?: Practical Strategies for Conducting a Functional Behavior Assessment”

Individuals with ASD exhibit a variety of problem behaviors that interfere with their learning and often a long-term quality of life. As professionals, conducting a functional behavior assessment leads to understanding the underlying purpose of the behavior while identifying replacement behaviors. In this workshop, participants will examine the functions of behavior and identify proactive strategies for teaching replacement skills and modifying antecedents. Participants will write a behavior intervention plan which includes reinforcement techniques. Dr. Lori will provide evidence based strategies for conducting an FBA and practical strategies for implementation in a variety of settings.

Afternoon Session Description:

“Girls Under the Umbrella of ASD: An Exploration of Females on the Autism Spectrum”

Females with ASD are often underdiagnosed or misdiagnosed. During this session, Dr. Lori Ernsperger will review preliminary findings for the gender disparity between males and females with ASD including genetic differences, socialization, and gaps in diagnostic tools. During this workshop, Dr. Lori will highlight the core gender differences between boys and girls on the autism spectrum. The focus of this presentation is to provide strategies for improving diagnostic procedures for females with ASD and ultimately improve long-term outcomes and a quality of life.
