

Annual Fund

I was recently reminded, by a parent, about how long Hilltop has dreamed of having a Learning Specialist on staff to assist teachers and students. Wendy's involvement with the children working hard to learn to read has indeed been a dream come true. We've also seen wonderful benefits, as a staff and community, to having Becky work as an assistant to Lower Elementary: helping with math, with transitions to activities, and providing a more age appropriate After Care for just the elementary age. We have also been thrilled to see Toddlers join our midst – everyone regularly stops to peek in at the little ones learning how to navigate their environment.

These new additions are some of the things that our fundraising and grant writing helps to make happen. These "extras" are wonderful benefits that cost more than what tuitions cover. We are thrilled to be able to provide these this year and look forward to further improvements. Please consider these investments in our staff and programs as we begin this year's Annual Fund . . .
