Milap A. Nowrangi, M.D., M.S. is a board-certified neuropsychiatrist and cognitive neuroscientist. He is director of the Memory and Care Program at Sibley Memorial Hospital and training director of the Behavioral Neurology and Neuropsychiatry Fellowship at the Johns Hopkins School of Medicine where he holds the rank of Assistant Professor. He sees patients primarily at the Memory and Alzheimer’s Treatment Center at Johns Hopkins Bayview. His NIH funded research is to study the neuroanatomical foundations of financial decision-making in Alzheimer’s disease and uses sophisticated structural and functional neuroimaging methods to measure how certain brain networks change over the course of the disease. He is interested in developing technology solutions for cognitive decline for individuals suffering from these diseases and their caregivers.

Thursday, October 5, 2017
5:30 -7:30 p.m.

The Alzheimer’s Association Walk to End Alzheimer’s® is the world’s largest event to raise awareness and funds for Alzheimer’s care, support and research. Each year, more than 500,000 people of all ages and abilities come together in over 600 communities nationwide to reclaim a future for millions. Together, we can end Alzheimer’s disease, the nation’s sixth leading cause of death.
