Bizminer

We're excited to announce that we'll soon be releasing our redesigned website!

Site navigation remains largely unchanged, but a few adjustments have been made to the *BizBenchmarker* report.

07/9/2018

BizBenchmarker (Release Date: June 2018)

[722511] Full-Service Restaurants

Sales Class: industry-wide (3 year)

Casper, WY Metro Area

Use the “Inputs” icon that’s listed on your account page to bring up the options you previously chose during the selection process.

New BizBenchmarker Feature

Instead of creating a new report with each edit, you’ll now be able to tweak your data inputs and display settings from your account page.

After clicking on the “Inputs” link, choose your display settings and upload your data from the options below.

BizMiner Input Options

Home > BizMiner Input Options

There is no longer an option to select the years you want to display.

After submitting your inputs, the report will only display industry data for the years you entered.

If no inputs are entered, the report will show all 3 years of industry data.

Display settings:

CONFIGURE DISPLAY SETTINGS

Data Input Upload:

1. Download the BizMiner BizBenchmarker Input Template and save it offline as a CSV file.
2. Populate the template offline.
3. Select the Browse button, find the populated CSV file on your device and upload it.
4. Use the Submit button to complete the process.
5. Generate the report. Your financials will be integrated; percentages, summary line items and ratios will auto-calculate.

Download the template and upload your data

OR

Select the manual option to enter your inputs from your account.

OPTION #1: DATA INPUT UPLOAD

Manual Inputs:

1. Input individual firm line item values for each year. Your inputs will autosave.
2. Select the Submit button to return to your report storage page (My Reports)
3. Generate the report. Your financials will be integrated; percentages, summary line items and ratios will auto-calculate.

OPTION #2: MANUAL INPUTS

Bizminer

After clicking on the "Configure Display Settings" choose the ratios to display and add developer and client logos.
