

## ABOUT THE COALITION

Founded in 2018, the Coalition is an employer-led effort that, together with our Strategic Partners, seeks to use our collective influence to uncover solutions that drive real change in the health care delivery system and reduce costs. Our members include business organizations representing thousands of large and small employers across Massachusetts. The Coalition is seeking additional employer members to join, and intends to work collaboratively with its strategic partners and other important health care stakeholders, including health plans, hospitals, physicians, consumer advocates, labor unions, government agencies, and community organizations.
