

TRAVELING WITH A TODDLER

This resort has several pools for the little ones and the adults. Ka'anapali Beach is just steps away and perfect for sunsets, making sand castles and running along the shore. There's a small park on the property and feeding time for the Koi where your little ones actually get fish food to feed them! There are several restaurants and a market on site so you're sure to have something for everyone.

This property was great to stay for a family. Staff was very nice including daily cleaning and even running your dishwasher if you had any dirty dishes. Our time at the resort was so pleasant allowing us to do many things around the property without having to leave. This is one resort we would be happy to stay at again and tell our friends about.
