

# HAAKE Viscotester iQ Special offer

## Discover the individual, intuitive and intelligent rheometer series

The Thermo Scientific™ HAAKE™ Viscotester™ iQ rheometers are the instruments of choice for acquiring simple viscosity curves, as well as for more complex rheological investigations in rotation or oscillation. Used as a standalone unit, or controlled by Thermo Scientific™ HAAKE™ Rheowin™, its size and footprint make the HAAKE Viscotester iQ rheometer a portable unit for mobile use, or as an important tool in the quality control laboratory.

### Stay mobile and flexible with the HAAKE Viscotester iQ setup for mineral slurries

For inhomogeneous samples with larger particles, such as ceramic suspensions, construction materials, mortars and grouts.

### Recommended measuring routines

- Relative viscosity determination
- Yield stress measurement
- Time depending hardening/drying

Benefit now, request a demo or quote and refer to the “Paste 2018 promotion”:

**SPECIAL OFFER**  
Exclusively for the  
PASTE 2018 show

**Save twice**

Buy a HAAKE Viscotester iQ configuration and receive 10% discount, plus get the transport case for free.

- 603-1063 HAAKE Viscotester iQ measuring head with lab stand with divisible rod
- 222-2070 Rotor FL22 4B/SS with “Connect Assist”
- 098-5062 HAAKE RheoWin rheometer control and data evaluation software
- 603-1062 Transport case for the complete measurement configuration will be included free of charge!

\* Offer valid until November, 30<sup>th</sup> 2018.
