Paula Buchanan/Residents at 3050 SW Doyle Place, Apt 5011, Aloha, Oregon 97006

Subject: PSRB Former Client/Registrant: Reynaldo Rios, (Law Enforcement: Call PSRB for SID)

In accordance with ORS 181.835, this letter is notification to law enforcement and residents living in the same household as Reynaldo Rios that the above sex offender registrant is no longer under PSRB supervision nor resides at Oregon State Hospital (OSH), effective January 25, 2017. Mr. Rios may pose a risk of sexual re-offending to the public. Law enforcement may want to notify appropriate individuals/organizations who may be most at risk as indicated below.

The PSRB has 60 days upon discharge to finalize a registrant's classification under ORS 181.800. The preliminary classification for Mr. Rios appears to be Level III (high risk) and we expect to have Mr. Rios' final classification completed and submitted to Oregon State Police by March 2017. Based on the PSRB's exhibit file which includes comprehensive sex offender risk assessments and multiple clinical opinions about his risk for re-offending, no matter what his final classification level, the PSRB has serious concerns about Mr. Rios' risk. Paragraphs 1-5 below contain information that may be helpful to law enforcement in deciding what steps should be taken to notify the public.

1. Mr. Rios was found guilty except for insanity of the crimes of Rape I, Sodomy I, Kidnapping II, Burglary I (2 counts) and Criminal Mischief I and was placed under the jurisdiction of the Psychiatric Security Review Board for a maximum period of time not to exceed 55 years by Washington County Judge Ashmanskas on July 31, 1984. Mr. Rios resided at OSH between 1984 and January, 2017, because the Board never found him appropriate for conditional release into the community.

2. On January 25, 2017, after a full PSRB hearing, Mr. Rios was discharged from jurisdiction after the evidence supported the finding that Mr. Rios does not have a qualifying mental illness to remain under PSRB supervision. Under ORS 161.341(1) and ORS 161.346(1)(a), the Board was required to discharge Mr. Rios. This means he no longer is on any supervision whatsoever and no longer resides at Oregon State Hospital. Mr. Rios was discharged despite having current diagnoses of Other Specified Paraphilic Disorder with possible Pedophilic and Exhibitionistic Disorder, Antisocial Personality Disorder and several substance abuse disorders. Under Oregon law, Pedophilia, Antisocial Personality Disorder and substance abuse disorders are not qualifying mental illnesses to remain under PSRB jurisdiction.

3. Mr. Rios has indicated that he will reside at 3050 SW Doyle Place, Apt 5011, Aloha, Oregon 97006, with his sister, Paula Buchanan. This appears to be a neighborhood that likely has children living nearby.

4. Mr. Rios' target victims include prepubescent females. In 1984, he broke into a stranger's apartment, dragged a 75-year-old man (victim's grandfather), who was sleeping on the couch, into the bedroom. When the man yelled, Mr. Rios took a pocket knife and held it to his throat saying, "If you make a sound, I'll cut your throat." Mr. Rios then walked into another bedroom where a six and seven year old sister and brother were sleeping. He pushed the boy down to the ground then carried the girl to the living room and subjected her to kissing, cunnilingus and repeated vaginal intercourse. Mr. Rios is at risk for reoffending should he have unsupervised contact with minors.

5. With regard to his risk for sexual re-offending, Mr. Rios has been rated as moderate to high for sexual re-offending on multiple risk assessments while under the PSRB's jurisdiction. He has been characterized as a cross-over offender, meaning he is most likely to engage in opportunistic and situational offending, with crimes ranging from attacks on young children, to exhibitionism, to the abduction and rape of adult females. The evidence supports his risk is elevated in an *unsupervised* setting due to a history of juvenile and adult criminal behavior, antisocial personality traits, problems with relationships and employment as well as treatment unresponsiveness. He also lacks insight which is evidenced by emotional instability, a dearth of coping skills, limited social supports and refusal to participate in any sex offender treatment while at OSH since 2013. While at OSH he repeatedly targeted female staff with unwanted touching, lewd remarks, and indecent exposure. Additionally he has a history of victimizing severely ill, non-consenting male patients.

I hope the above information is helpful to you in consideration of notifying persons, businesses, or organizations that may be at risk in the event Mr. Rios has unsupervised access to children. **At a minimum, persons who will reside or live near Mr. Rios should be encouraged to never leave children alone with Mr. Rios.** Finally, releasing Mr. Rios' information on the OSP Public Website is requested.

Please don't hesitate to call me if you have further questions.

Sincerely,

Juliet Britton, J.D.
