HELP ELIMINATE AUTO THEFTS

Free MCOLES Certified Law Enforcement Training

Modern Methods of Auto Theft Investigation & Identification

AUDIENCE:

- MCOLES certified police officers, patrol officers, detectives, DNR conservation enforcement officers, Federal & Tribal law enforcement agents and officers.

COURSE DESCRIPTION:

- As automotive technology evolves, so do the actual theft methods of modern-day car thieves. To effectively combat auto theft related crimes law enforcement investigators must also advance their investigative skills and techniques. This MCOLES certified course is the most modern, comprehensive, and current auto theft investigation & identification course in the State of Michigan; designed for all law enforcement personnel, especially road patrol officers, detectives, and vehicle inspectors. Attendees will be instructed on past and present VIN formats, designs, and factory locations of the vehicle identification numbers, including past and present methods and trends as they relate to altering and concealing the true identity of stolen vehicles. Attendees will also be educated on the most current theft trends and crimes associated with auto theft. Attendees will also be briefed on successful case studies, prosecution case prep, and various investigative techniques utilizing LEIN, NICB, and other databases and technologies.
