## ESCC's Leading-Edge Security and Communications Systems For Country Homes

ESCC has been designing and installing comprehensive security and communications solutions for some of the finest country homes for over 30 years.

As providers of custom designed and integrated solutions for luxury residential homes, ESCC prides itself on being at the forefront of security and communications technology as the needs of these residences continue to evolve.

Says Robert Horowitz, President of ESCC, "At ESCC we understand that not only is every home unique but so are the families occupying them. ESCC believes in providing sophisticated security and communications solutions built not just around the design of the home but, just as important, the lifestyle of the families within that home."

ESCC provides custom residential security services such as Perimeter Security, IP CCTV, Home Intercom Systems, IoT Technology, Mobile Access Technology, Low Voltage Cabling and Telecommunications systems.

### The ESCC Five Step Process

ESCC's five step process ensures that we meet and exceed the integrated security and communications needs of your home or property from start to finish - and even beyond.

- 1. Assess** - Our system consultants meet with you to assess your residential property's individual needs.
- 2. Design** - We prepare an in-depth proposal outlining the products and options that are right for your specific property type.
- 3. Install** - Our installation team installs the system based on our custom design plans while our project managers oversee the installation to assure you it is done right.

ESCC always uses only high quality, industry-leading equipment that can be upgraded in response to the ongoing advances in the communications and security industries.

**4. Train** - Our management consultants train you, your family or your staff on every detail of our user-friendly system.

**5. Service** - Our service technicians are on call 24/7 to keep your system operating properly during your warranty period and beyond.
