Wrap-up round table discussion with lunch 11:00 – 1:30 at Great Basin Education Center

2:30 Depart for RCCA Conference in Park City Utah.

## Snow College

## Great Basin Environmental Education Center

Located 10 miles east of Ephraim, at 8900 feet on the Wasatch Plateau, the established Great Basin Environmental Education Center is managed and staffed by Snow College. Considered one of the eight birthplaces of the U.S. Forest Service, the facility of nine historic buildings nestled in the pine and aspen forest was originally the Great Basin Experiment Station, established in 1912.

Dormitories, a lodge, classrooms, a field laboratory, a cafeteria, an amphitheater, and a dining hall are all restored and renovated to provide a living-learning center for up to 60 students, teachers and researchers. The site provides an excellent opportunity for a variety of hands-on field investigations, as well as a center for workshops, conferences, and retreats by institutions and organizations interested in environmental education.
