Subject Title: A Practice Management Evaluation of your Revenue Cycle

Has your facility ever had a practice management evaluation? Do you know what is involved with this process? Do you know if every step of your revenue cycle has checks and balances in place?

1. Are your providers credentialed / enrolled with your insurance carriers?
2. Are all your charges posted timely?
3. Are all your payments posted?
4. Are you using your practice management software efficiently?
5. Are you running the right reports on-a-monthly-basis?

These are just a few items we are going to talk through.

Healthcare and technology is always changing. We can't afford to let little-things slip through the cracks. Each missed step can cost facilities money and create re-work.

As a healthcare consultant, I will provide multiple examples of steps that clients have missed. Not only did it cost the client money, but also created PR issues with their patients.
