

ROAD CLOSURES UPDATE

MARCH 3, 2017

SH-9E and Lindsey Street Interchanges on Interstate 35

ODOT is currently reconstructing the SH-9 and Lindsey Street Interchanges on I-35. All of the ramps for the SH-9 interchange are open but all of the Lindsey Street ramps are closed except for the I-35 southbound off ramp. This ramp is open which only provides access to Lindsey Street on the west side of I-35 since the bridge over I-35 is still under construction. The Lindsey Street Bridge over I-35 remains closed and is expected to be reopened in July 2017.

Lindsey Street Bond Project

Construction on the Lindsey Street Bond Project is occurring throughout the corridor from 24th Avenue SW to Berry Road. McGee Drive north of Lindsey Street is currently closed for relocating a sanitary sewer line and the construction of a junction box for the storm water drainage system. The contractor expects to keep McGee Drive north of Lindsey Street closed and continue to install the drainage box going north on McGee Drive. McGee Drive will be reopened early June 2017.

Berry Road between Barbour Avenue and Denison Drive

Berry Road between Barbour Avenue and Denison Drive will remain closed except to local traffic only while re-construction of Berry Road proceeds from north to south. Denison Drive is open to east and west traffic; Barbour Avenue is closed to the west. The road closure is expected to continue for one to two weeks.
