We are really looking forward to seeing everyone in Minneapolis this September. Since the membership drive was extended we are excited to see some of the results. There will be some great rewards for top performing members!

The membership committee is continuing our work on refining the membership mentor program. We want to do our best to welcome new members, first timers, and new member companies. Our goal is to make sure new companies fully understand all of the benefits received from their EGSA membership.

We are looking for additional mentors, if you love this organization and want to help us in our efforts please come to our committee meeting for the details.

If you are a new member we would also welcome your attendance to our meeting. New perspectives and ideas are always welcome.

Best Regards,

David Oshefsky
