

Accelerated Math Summer At-Home Program

Dear Pearl Parent,

We are once again offering a math resource program this summer to Pearl students currently in Kindergarten - 5th grades who would like to improve their math skills.

Available: May 31- August 10th

Registration due by Fri., May 25th - first set of materials will be sent home in the May 29th envelope.

Fee: \$20.00 per student for at home program

How the at home program works:

1. Your child will be assigned online Accelerated Math Practices to complete at home. (Paper available by request.) Then when they are ready, they will be assigned a paper test to pick up and return to Pearl or Kare Offices.
2. When your child completes a test and you or your child completes a scantron card, you will turn them into the Kare Youth League or Pearl offices.
3. Pearl will pick up the materials each week and return it with your score sheets and new test so that you can pick them up when you have Kare activities or whenever the Kare office is open.

This is an optional program to help you better help your child with their math. This is not a competition. We encourage you to set goals with your child and reward them for passed objectives.

Contact Mrs. Moore with questions regarding the math program
Email lmoore@pearlprep.org or call 626-442-7737.

Student's Name _____

My child would like to sign up for the Accelerated Summer Math at-home project.
