

"Every Cat, Every Day Benefits From Winn-Funded Research"

November 14, 2018

Winn Offers Grant Writing Resources

Winn Feline Foundation encourages any clinicians and scientific investigators who plan to submit future grant proposals and are not familiar with grant writing to check out our new online resources.

Winn offers a Grant Guidance checklist and templates for budgets, timelines and abbreviations: definitions for downloading.

Winn also has previously approved and published study proposals that can be viewed upon a request to grants@winnfelinefoundation.org. Additional articles about study design, statistics and other important tools for your research project's development can be requested.

Forms for grant awardees to report a study's interim or final progress or for a No Cost Extension (NCE) are available for downloading.

Winn is working on development of a webinar advising about "how to write grant proposals". An announcement will be made when the webinar is available for viewing.

More details can be found on Winn's website at www.winnfelinefoundation.org/grants/grant-process under the Application Forms expanded table.
