

### **Anatomy and Physiology Summer Assignment.**

Please find some time over the summer to read Chapter 2 of the Essentials of Human Anatomy and Physiology textbook: Basic Chemistry. It reviews matter, energy, molecules, compounds, bonding and reactions. It also deals with some biochemistry- acids/bases and macromolecules. All of this should be familiar to you from Biology and Chemistry.

Make a study guide based on the chapter contents (this will receive a grade), test yourself using the review questions at the end of the chapter, and be prepared to take a test on the chapter during our first whole week back.

Access the online textbook using [www.masteringaandp.com](http://www.masteringaandp.com) and student access code  
SSNA-ST-BLUFF-SAROD-COTAN-TAPIR-PRIES

Have a great summer!
