

**Learn to Code!**

**For more information email  
PHLCoderDojo@gmail.com**

Philly CoderDojo is a worldwide network of FREE, volunteer-led, community-based programming clubs. Anyone from the age of 7 to 17 can visit a dojo and learn how to code, build websites, apps, or games and explore technology in a laid-back, creative, fun and social environment.

#### **What is my child going to learn?**

CoderDojo is not curriculum based, so every Dojo covers different topics. Often young people will start with Scratch, a visual programming tool, or by building their own website.

#### **What does my child need to bring?**

In most Dojos you will need to bring a laptop. If you don't have one check with the Dojo as some Dojos have spare laptops to lend. Don't forget curiosity and a positive attitude too!

**Can parents help?** Yes, you can absolutely help! If you have technical skills you can mentor at the Dojo. If not, you can help out with registrations, check-in, and promoting the Dojo both online and offline. Inside a CoderDojo
