About the Home Fire Preparedness Campaign

The **American Red Cross Home Fire Preparedness Campaign** is rolling out across the country, aiming to reduce the number of deaths and injuries from home fires by installing smoke alarms in homes throughout the United States. The campaign aims to reduce the number of deaths and injuries from home fires by as much as 25 percent over the next five years. **Along with installing smoke alarms, the Red Cross is joining with fire departments and community groups nationwide to canvass neighborhoods and teach people all over the United States about fire safety.**
