

## A REMINDER FROM

Dear Families:

Beginning in June 2017, any family that is set to receive invoices from Smart will receive them electronically, instead of through the mail.

### **There are many benefits of electronic invoicing:**

#### **Convenience**

Families can easily access their invoice just by opening an email. It's the convenient and environmentally friendly way to access monthly statements.

#### **Statements are protected**

Paper invoices can be misplaced. Sometimes they are stolen from mailboxes or trash. Online statements are secure and password protected.

#### **Modern delivery**

Most companies have moved to online delivery. Additionally, every time an electronic invoice is sent, it's logged on the family account, so your school is aware of the date the invoice was sent.

#### **Faster access to payments**

Families can see their balance and quickly make payments online. Payments will likely get to your school sooner.

#### **Good for the Earth**

Encouraging online paperless billing makes us good stewards of our environment and natural resources. It's a good thing.

If you require a paper statement, please go online to your Smart account and select the opt-out of electronic invoices.
