

# Great News!

## FLACRA RECEIVES STATE FUNDS

We are very excited to announce that FLACRA was awarded \$3.5 million through the Department of Health State Wide Health Care Transformation Program to renovate the Clifton Springs building we occupy. As many know, this facility has been in desperate need of improvements. More significantly, it will include expanding by 25 treatment beds. This could result in moving the outpatient clinic and administrative services out into the community. This will take a year or more to make happen.

## CENTER OF TREATMENT INNOVATION (COTI)

FLACRA was also awarded \$1.5 million to address the Opioid Crisis plaguing our communities. As a COTI for the State Targeted Response (Opioid STR) initiative, we will concentrate on increasing access to treatment, attending to unmet treatment needs and reducing opioid overdose related deaths for those in Ontario and Yates counties. Adding medical, peer and clinical staff to our already growing FLACRA family gives us the ability to utilize resources and provide 24-hour access to those in need. The addition of our new tele-health system will allow us to provide treatment services through audio and video platforms. Our new mobile van will be our conduit for tele-health. This will give the opportunity for an individual to see a doctor, nurse, clinician and/or peer electronically. These are exciting times ...Together We Will!
