The 2015 Discovery Amendments: Will the Eighth Time be the Charm for Meaningful Reform?

Broad discovery in civil cases has been the subject of complaints since it was put into place in 1938. Complaints of irrelevant, unreasonable, and disproportionate requests, and unreasonable and obstructionist objections, are common. E-discovery has added to the complications and to the resulting costs, burdens, and delays. Since 1980, the rules have been amended seven times to try to address the problems. The 2015 discovery amendments are the most recent attempt to reverse the problems. Judge Lee Rosenthal of the Southern District of Texas, one of the most influential jurists on the topic, discusses whether the eighth time will be the charm.
