Calling all student engineers! Mark your calendars for the 5th Annual Solar Jam event!

Check out these details…

**What is it?** SolarJam is a solar powered car race. It is hosted by O.A.S.I.S.

**Where is it?** Princeton High School’s tennis courts.

**When is it?** May 19th, 10 A.M.-1 P.M. (The rain or ‘too cloudy’ date is May 20th at the same time)

**Who can compete?** There are two divisions, Elementary (grades 3-5) and Middle School (grades 6-8).

**Why should I compete?** You should compete for many reasons!
1. It’s a fun way to practice your engineering skills and be a part of the Renewable Energy Revolution!
2. The top three cars in the middle school division will be eligible to compete in a larger race.
3. You will compete against and meet student engineers from other area schools.

**Where and with who will I make the car?** This is not an in-school project. Contestants will make the cars outside of school. Students can work individually or on teams of up to four.

**Is this going to cost money?** Registration is free, but you need to purchase at least a solar panel and motor to build your car. Details are at the bottom of this page.

**I’m interested!!! What do I do now?** Read the rules, register and find out where to buy the materials, at https://tinyurl.com/solarjam2018

Please Register by May 5th, 2018.

**Questions?** Contact Andrew Lloyd at theandrewlloyd@gmail.com
