

Hurricane season is here.

Are you prepared?

There's not much you can do to match the destructive force of a hurricane, however, there are ways you can ensure your customers are prepared by obtaining the right coverage for their needs. ICAT can offer protection and peace of mind to keep your customers afloat in the event of a storm.

Provide your Customers with Peace of Mind

Before, During and After Hurricane Season

What makes ICAT Boulder Claims different?

Our wholly-owned subsidiary, Boulder Claims, pays claims quickly and fairly.

New claims can be reported 24 hours a day, 7 days a week.

Our team has 245 years combined experience, we've handled over 29 events, managed 23,000 claims and paid out over \$1.05B in claims.

Our best-in-class customer service will be there with answers to questions when your customers need it most.

Hurricane Season Facts

- > Hurricane season runs from June 1 through November 30
- > Hurricane is defined as an “intense tropical weather system with well-defined circulation and sustained winds of 74 mph or higher” according to the National Weather Service
- > Hurricanes are rated according to intensity on the Saffir-Simpson Hurricane Wind Scale
- > The 1-5 scale is based on the maximum sustained wind speed
- > A Category 3 storm or higher is considered a major hurricane

2017 Hurricane Season Predictions

Atlantic Landfall Predictions: NOAA, North Carolina State University, Tropical Storm Risk and The Weather Company are calling for a near to above average 2017 Atlantic hurricane season.

Pacific Landfall Predictions: NOAA, Mexico's National Meteorological Service and AccuWeather are calling for a near to above average 2017 Pacific hurricane season.

ICAT Damage Estimator

The ICAT Damage Estimator uses historical damage data to estimate the impact that past hurricanes would have on today's exposure. Customers can easily do their own damage analyses based on the expected impact of currently active storms or based on various user-defined parameters.

The Galveston Hurricane of 1900 would have been the second most damaging historical storm if it were to occur today. Find out what the #1 most damaging storm is at icatdamagaeestimator.com!

Are your customers prepared

for hurricane season?

It's time to help your customers make important decisions to help keep their family, businesses and property safe during hurricane season. Below are some tips to help your customers prepare.

Provide your Customers with Peace of Mind

Before, During and After Hurricane Season

Know the Forecast

A hurricane warning is more serious. A hurricane watch means hurricane conditions are possible within 48 hours. Stock up on supplies and be prepared to evacuate if you are in a coastal area.

Preparation Tips

- > Create a safety plan for your home and business. Have an evacuation route and outline what you can do and who to call in the event of a disaster.
- > Build an inventory of items in your house and business.
- > Prepare survival kits with flashlights, batteries, non-perishable food items, water, medications, chargers, etc.
- > Perform routine maintenance and checks for trimmed trees, gutter cleaning, debris removal, drain clearing, etc.
- > Review your insurance coverage to ensure you understand and are properly covered on all fronts in the event of a storm.
- > Secure all outdoor objects or move them inside. If your home or business has storm shutters, close them or board up the windows with plywood.
- > If you have an emergency generator, make sure the fuel tank is full and store in a garage or shed, away from open flames or heat sources.
- > Elevate any valuable items on the floor of basements or first floors with place them upstairs or on higher ground. Place important documents in a waterproof container and move from floor.

What to Expect from ICAT During a Catastrophe

- > During a storm, you will receive real-time updates on the icat.com Active Storms page, as well as email bulletins containing important storm updates.
- > ICAT relationship managers will send out all potentially impacted policies to producers before the storm makes landfall.
- > ICAT will keep producers and customers updated on the storm's tracking via social media channels.
- > ICAT and Boulder Claims perform yearly cat simulation drills to ensure all team members are prepared in the event of the storm. During these drills, we test our cat plan and make any necessary updates. All cat simulations are treated as if they were a real event.
