

## Central FL Organics Compost Facility Update

August 2016

## Central FL Organics Compost Manufacturing Facility Open for Business

Central Florida Organics Facility (Haines City) officially opened its doors on August 13, 2016 with Haines City biosolids first in the door.

Total biosolids volumes received at the Compost Facility for August were approximately 400 tons.

Total bulking agent volumes received at the Compost Facility for August were approximately 600 tons.

The Compost Facility started composting in Bay #1. The compost met the 14-day compliance period on Sept 3<sup>rd</sup>. Bay #1 compost will be moved over to curing bay #8 for an additional 20-day quality control period.

### First Biosolids Received

Mike Stripling delivers the first load of City of Haines City biosolids to the Central FL Organics Compost Manufacturing Facility on August 13, 2016.
