**Emergency Responder Radio Coverage  
Two-Way Radio Communications Enhancement Systems  
Fire Fighter Radio Communication Systems  
Bi-Directional Amplifiers**

- Introduction
- Quick overview of different types of public safety radio communications systems that are being used in NH
- Reliable Radio Coverage for fireground operations - the challenges
- Introduction to in-building radio communication enhancement systems - BDA systems and signal boosters, overview of a typical BDA system and its components
- Technical requirements per NFPA72–2010, NFPA1–2009 and IFC-2009
- Typical steps in deployment of a BDA system – from the initial survey to final testing and acceptance
- FCC licensing and certification requirements for BDA systems
- Overview of a typical ordinance and technical specification for in-building radio coverage and our experience working with Boston Fire and many other fire departments
- Q & A

**Guest Speaker:**

Admir Surkovic is a radio systems engineer, Founder and CEO of Radio Solutions, Inc. (RSI), a Norwell, Massachusetts based manufacturing company.

Admir has been developing, designing and deploying public safety radio communications systems for over 25 years, and has designed a full line of patent-pending, market leading signal booster (BDAs) that are now proudly being manufactured in Norwell, Massachusetts.

Radio Solutions, Inc. is dedicated to advancing and delivering wireless communications technologies that help our first responders save lives and improve public safety.
