RSVP by August 17th

Have you ever found a new way to do a job or task that makes it easier?

Have you ever had someone tell you that he does something "their way" and you slap your forehead like "why didn't I think of that?"

Has your information system ever told you one way to do a job, but you found a much easier way?

If you answered "yes" to any of these questions, gather up your technicians and service advisors and join us for a fun exchange of time-saving, money-saving and work-savings tips.

This instructor/technician led discussion includes a presentation that is chocked full of great tech tips as well as several popular technician tools & tactics. The group will be sharing your favorite tools, why you couldn't live without them and how they've made it work so well for them. You might learn some new uses for tools you already have or understand the importance of having the ones that aren't already in your toolbox!
