Gene Decker 9/24

Rich Barbieri 9/30

INSIDE THE JOYCE AGENCY

Newport News Opening was a Success!

On June 6th, The Joyce Agency celebrated the opening of our Newport News location. We would like to thank everyone who attended our event, especially our manufacturers who really made this event successful! I special shout out to our own CJ Snyder for building a smoker made from Watts parts, that provided the food for our event.

Joyce on the Job

The Joyce Agency Installs Sloan at Hollywood Casino

SLOAN

The AerDec Sinks at Hollywood Casinos at Charles Town Races are a stunning example of how restroom innovation meets style! In addition to their stunning looks, these fully customizable sinks have an innovative design where all three handwashing components are centralized within the sink basin area! With an integral HEPA Filtered hand dryer system that keeps the air from blowing back at the user, and beautiful coordinating faucets, soap and hand dryers, these sinks are functional and beautiful!

These sinks take roughly about 6-8 weeks from date of signed drawings/selection sheets and purchase order to shipment and are custom fabricated for each individual application/location. Each component is selected by the owner, architect, and designer from the material (Corian, Corian® Quartz, Silestone, etc.), to the size and number of stations/faucet groups, the enclosure material (Stainless Steel or Laminate), to the finished edge type, and faucet model!

The Hollywood Casino sinks shown here are made from Corian® Quartz and feature custom laminate cabinets for concealed access to the underdeck plumbing components.

MANUFACTURER ANNOUNCEMENTS

A look inside Watts operations in Franklin, NH

Watts is pleased to make available a new video highlighting their Franklin, New Hampshire, operations.

The video highlights their capabilities and key product offerings manufactured and assembled in the USA. It also provides a great reminder of Watts' commitment to domestic manufacturing. **Click the video below to watch!**

www.watts.com

Sloan Pressure-Assisted Toilets

Sloan invented pressurized flushing. With a Flushmate® vessel supplying the pressure and

Sloan's reputation for durability providing peace of mind, you'll be confident in your toilets' performance for years to come.

Even the highest-traffic toilets will be far less likely to back up or clog, because pressure supplied by the Flushmate® vessel pushes waste out of the bowl and into the drainline far faster than a gravity flush.

Simple and cost-effective, they install exactly the same way as gravity toilets and require the same basic water supply pressure (20–25 psi).

Codes Corner

ICC What's New: Join the Underground Revolution!

The International Plumbing Code (IPC) continues to show its green as it expands its trenchless technology coverage to include the replacement of underground building drains. Pipe bursting as it is commonly referred to, involves the replacement of an old pipeline with a same or larger diameter pipe in a process that destroys the original pipe as the new one is installed. The pipe

bursting tool, which is pulled through the sewer by a winch or rod, is located at an upstream opening, forces its way through existing pipe materials by fragmenting the old pipe and compressing the broken pieces into the soil as it progresses from one end to the other...
