(arettinger@golder.com). For all other inquiries contact
Lara Kammereck (LKammereck@carollo.com)

You're Invited!

The goal of Women in Leadership is to bring water-related professional women in engineering and science together for a day to network, learn, and share the answers to the critical questions of our time:

- How can we attract more women in leadership roles?
- Who do we want to be as leaders?
- How can we fulfill our potential as leaders and manage competing personal and professional demands?

We welcome women from all professions to come together for this event. You will walk away with:

- Tools to increase your own effectiveness
- Greater insight into your own potential
- The support of a network of women ready to increase the role of women in leading professional organizations

Learn and Be Inspired

This symposium is about local women leaders, at all stages of their career and in different circumstances learning from each other. We aim to promote and encourage women to take an active role in defining their own destiny and to benefit our professions.

Morning keynote speakers will include women leaders in the public and private sectors.

Choose from three topics in the afternoon sessions

1. Skills for Success
2. Case Studies: Paving the Way Into the "Off-Grid" Market.
3. Financing Our Future.

The absence of women in senior leadership represents both wasted talent and a lost opportunity to transform our workplace. How are we going to change it?
