About CLASS Fund

Established in 1980, CLASS Fund's purpose and mission is to provide scholarships, internships, and fellowships at appropriate educational institutions offering curriculums in landscape architecture and industry-related fields of study; receive and administer gifts and bequests; to assist educational and scientific research projects; and to grant and confer awards or citations primarily in recognition of those areas that CLASS Fund supports, and to every extent reasonable, the efforts, activities, and visibility of other landscape-related professional organizations to the extent that the given support is consistent with its stated exempt purposes.

CLASS Fund's original intent remains to provide scholarships that recognize:

- Promising students who are continuing their educational pursuits
- Outstanding accomplishments with financial assistance
- Promise and commitment for and to the profession

Scholarships are available to undergraduate or graduate students enrolled in accredited programs of landscape architecture, ornamental horticulture, and irrigation science within California as well as extension programs in landscape architecture. All applicants must be continuing their studies within their respective fields of endeavor.

Included are the programs from the following universities:

- Cal Poly Pomona
- Cal Poly San Luis Obispo
- UC Davis
- USC
- UCLA Extension
- UC Berkeley Extension

In 2014, to further advance the body of knowledge for the landscape industry, the CLASS Fund has entered into an agreement with CELA (Council of Educators in Landscape Architecture). The mission of this agreement is to support scholarships and research among academic units in landscape architecture, horticulture and related fields, both in California and in other states, provinces or jurisdictions in which CELA institutions are located. CLASS Fund has a cooperative relationship with CELA involving the solicitation and review of research proposals related to the landscape industry.

The CLASS Fund Research Award is made each year to support a research project related to landscape architecture, horticulture, or landscape contracting in the following areas: sustainability; water quality, conservation or use; air quality; climate adaption or global warming; community capacity building or development; urban land use; sustainable or alternative transportation; urban heat island or greenhouse gas emission impacts; social, cultural and environmental capital; performative landscapes; or green infrastructure. Special consideration may be given to proposals that tie to on-going or new research programs.

We are proud to recognize some of our past CLASS Fund Scholarship Representatives that have gone on to make worthwhile contributions to the Green Industry
