Frames on Wheels

Custom Picture Framing

Our Mission – At Frames On Wheels, we are dedicated to providing our clients with tasteful design advice, a huge choice of quality framing materials, and the most professional workmanship to give them the very best solutions for all of their framing projects. Our goal is for each client to be completely satisfied with the design, quality, and value of every project we have the privilege to work on.

Our Background – Clients always ask... Why Frames on WHEELS? In 1985, we started off as a mobile frame shop. The founder, Sarah Fogerty, would drive to clients' homes with frame and mat samples. Once we had a devoted following, we opened the brick and mortar shop we are in now. The name stuck! We then built on this foundation and added thousands more frame samples and options. We have been steadily improving and expanding our selection and services ever since. Just this year, we added a computerized mat cutter which we are always happy to show off!

Our Blueprint for Success – We have been providing high quality custom picture framing to the Berkshires and beyond for over 30 years. Our most valuable asset is our staff. Our picture framers are there from design to completion so each project gets extra personal attention. Our newest framer has been with us for 14 years! We pride ourselves on out-of-the-box design solutions and attention to detail with every project we send out the door.
