ETL
YOUR REGIONAL
VALUE-ADD
DISTRIBUTOR

ABOUT US

# CREDENCE SECURITY

Established in 1999, Credence Security, a PAN-EMEA specialty distributor, is a leader in cyber security, forensics, governance, risk and compliance. With headquarters in Dubai and regional offices in Johannesburg, Nairobi and London, we are a pure-play provider of security and forensics solutions, to both public and private sector enterprises across Europe, Middle East, Africa and India, through a select network of specialist resellers.

Unlike most other distributors, we take a consultative 'value-add' solution approach – we collaborate with our partners and their customers to understand their needs, both from a technology and business perspective, and then work very closely with our partners to deliver tailor made solutions. As such, our clients rely on us and trust us to deliver best in class IT security solutions that will protect their organizations from some of the most severe and malicious attacks.

With the growing sophistication of threats today, we recognize that leading technologies alone cannot safeguard an organization – organizations need to ensure that they assess risk, comply with latest security regulations and foster a 'security-first' culture.

WHO ARE EVIDENCE TALKS?

# OVERVIEW

## ABOUT US

Evidence Talks is one of the UK's leading authorities on forensic computing, servicing clients in the military, law enforcement, intelligence, corporate and legal communities.

At the forefront of technical innovation in digital forensics and intelligence gathering, Evidence Talks has developed several unique proprietary products at its Milton Keynes R & D facility, including the three award-winning technologies, Remote Forensics,  SPEKTOR Forensic Intelligence and Cascade Forensics.

Using security cleared digital artists, ETL is able to conceive and produce Computer Generated Image (CGI) movies showing complex scenarios and concepts in a clever, artistic but effective manner. Clients for this services include Dell Inc and AccessData Corporation.

Founded on a reputation for excellence and reliability, Evidence Talks continue to establish strategic relationships with clients and, by clearly understanding business objectives, develop and deliver distinctive digital forensic services and unique products that meet specific operational needs.

CREDENCE SECURITY

# WHAT IS TRIAGE?

- Forensic triage is the practice of searching an exhibit in the field or lab to determine its priority in an investigation.
- Forensic triage is a practice which can be applied to narrow down the scope of investigation by filtering the irrelevant data.
- Font line investigators benefit the most from it by collecting the data in a forensically secure manner.
