Dave Wilson Nursery varieties for 2017:

Braeburn Apple New, from New Zealand. Superb late season fruit: very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours. Self-fruitful. USDA Zones 5-10.

Fuji Apple Introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid-September. Excellent pollenizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6-9.

Gala Apple Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Early harvest, 2 - 3 weeks before Red Delicious. Good pollenizer for other varieties. Adapted to cold- and warm-winter climates. Chilling requirement less than 500 hours. Self-fruitful. USDA Zones 4-10.

Granny Smith Apple From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollenizer for other apples. Self-fruitful. USDA Zones 6-9.

Gravenstein Apple Famous for sauce and baking, also used fresh. Crisp, juicy, flavorful & tart. Early bloom, early harvest. 700 hours. Pollenizer required: Empire, Fuji, Gala, Red Delicious. Not a pollenizer for other varieties. USDA Zones 2-9.

Honeycrisp Apple Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens mid-August. Pollenized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. USDA Zones 3-8.

Mutsu Apple A favorite of connoisseurs: very large, crisp and flavorful. Late September/October harvest. Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 500 hours. Pollenizer required: Red Delicious, Granny Smith, Fuji, Gala. USDA Zones 4-8.

Red Fuji Apple Redder skinned bud sport of Fuji. Sweet, very crisp and flavorful, excellent keeper. Ripe September-October in Central CA. Excellent pollenizer for other apple varieties. Self-fruitful. USDA Zones 5-9.

Winter Banana Apple Large, round, especially beautiful apple: pale yellow waxy skin blushed with rosy pink. Crisp, tangy, juicy flesh is highly aromatic with a mild, banana-like flavor. Long time favorite dessert apple in CA's mild winter coastal climates. Good cider apple. Harvest mid to late-September in Central CA. Good keeper. Vigorous, spreading tree bears at young age. Excellent pollenizer for other apples. Originated in Indiana, introduced in 1890. Low winter chilling requirement, less than 400 hours. Partly self-fruitful, biggest crops if cross-pollenized. USDA Zones 4-9.

Blenheim (Royal) Apricot All-purpose freestone. Sweet, aromatic, flavorful - the long-time No. 1 apricot in California. Early bloom. Late June harvest in Central CA. 400 hours or less. Self-fruitful. USDA Zones 7-8.

Flavor Delight Aprium® Interspecific Apricot Apricot-plum hybrid. Resembles an apricot but with a distinctive flavor and texture all its own. High taste-test scores, one of the most flavorful early season fruits. Early June. Very low chilling requirement, less than 300 hours. Self-fruitful, but largest crops when pollenized by another apricot. (Zaiger)

Summer Delight Aprium® Interspecific Apricot New introduction for 2016. This late-season Aprium® is a reliable bearer with very juicy flesh and great apricot flavor. Ripens late July-early August at Hickman, California. Self-fruitful, chilling requirement 500 hours or less. Best in zones 7-10. U.S. Plant patent pending (Zaiger)

Shinseiki Asian Pear Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August in Central CA. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 250-300 hours. Self-fruitful.

6GM25 Cherry New, long awaited, low-chill self-fruitful sweet cherry, expected to be a home run for Zaiger Genetics. Bright crimson with superb flavor, this important new variety has the added benefit of blooming with Minnie Royal and Royal Lee. Definite chill hour recommendation not yet determined. To be named. Patent Pending. (Zaiger) **Available in limited quantities for the 2016-2017 season.**

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA.
Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Craig's Crimson Cherry Taste test winner. Self-fruitful, natural semi-dwarf sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard (smaller when budded onto Colt or Mahaleb rootstock). Harvest begins early. 500-600 hours. USDA Zones 5-9. (Zaiger)

Lapins Cherry Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as 'Self-fertile Bing.' Ripens 4 days after Bing. 400 hours or less. USDA Zones 5-9.

Royal Rainier Cherry Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner. Ripens early, about 3-5 days ahead of Rainier. Chill requirement 500 hours. Pollenized by Bing, Black Tartarian and Lapins. USDA Zones 5-9. (Zaiger)

Black Mission Fig The industry standard. Purplish-black skin, strawberry-colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Two crops per year. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

White Genoa Fig Old variety, a favorite in cool coastal areas - also excellent inland. Greenish-yellow skin, amber flesh, distinctive flavor. Prune to any shape. 100 hours. Self-fruitful. USDA Zones 7-9.

Persian Fruiting Mulberry *Morus nigra* 'Persian' Densely foliated tree to 25-30 ft. Large heart-shaped leaves. Large fruit is juicy, dark red to black and good for jam.

Arctic Glo White Nectarine Exciting, sprightly-sweet, early season white-fleshed nectarine. High scoring in taste tests: nice balance of sugar and acid, very appealing flavor. Highly recommended for home orchards. Late June/ early July in Central CA. 400-500 hours. Self-fruitful. (Zaiger)

Arctic Star White Nectarine Earliest to ripen of the low acid, super-sweet white nectarines. Rave reviews in trial tastings. Beautiful dark red skin, snow white semi-freestone flesh. Ripens mid-June in Central CA, 4-5 weeks ahead of Arctic Rose. Low winter chilling requirement, about 300 hours. Self-fruitful. (Pat. No. 9332) (Zaiger)

Double Delight Nectarine Sensational fruit: consistently the best flavored yellow nectarine plus magnificent, double pink flowers. Dark red-skinned, freestone fruit is sweet, with unusually rich flavor. Very high scoring in taste tests. Heavy bearing tree. Harvest early to mid-July in Central CA. 300 hours. Self-fruitful. (Zaiger)

Necta Zee Miniature Nectarine Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central CA. Strong, vigorous tree to 6 ft. Best self-fruitful miniature nectarine. 400 hours or less. Self-fruitful. (Zaiger)

Arbequina AS1® Olive Arbequina has become California's top variety for oil production. Mild and fruit flavor with low bitterness, the fruit is very high in oil content. It has a compact growing habit and is moderately frost hardy. Self-fruitful, but produces higher yields when planted with a pollenizer such as Arbosana.

Arbosana L43® Olive Mainly grown as a complement to Arbequina, this variety has a more robust flavor than Arbequina. A compact grower that is moderately frost hardy. Fruit matures about 3 weeks later than Arbequina. Self-fruitful but produces higher yields with a pollenizer such as Arbequina.

Arctic Supreme White Peach Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central CA. 700 hours. Self-fruitful. (Zaiger)

Frost Peach Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish-yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July ripening. Showy pink bloom in spring. 700 hours. Self-fruitful.

Garden Sun Miniature Peach Yellow freestone, ripe one week after Elberta. Sweet, mild, low acid. 4-5 ft. tree. Showy blossoms. 500 hours or less. Self-fruitful. (Zaiger)

Honey Babe Miniature Peach Sweet, yellow freestone, rich peach flavor. Heavy bearing 5 ft. tree. Early to mid-July in Central California. Excellent choice for home orchard. 400 hours or less. Partly self-fruitful, sometimes shy-bearing without a pollenizer. (Zaiger)

Bartlett Pear World's most popular pear. Early midseason, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollenized by Bosc, D'Anjou, Winter Nelis.

Bosc Pear Long and narrow shape, brown skin. Superb quality, one of the best. Harvest late October. Use fresh or cooked. Susceptible to fire blight in warm, moist climates. 500-600 hours. Pollenized by Bartlett or other pear.

Warren Pear Excellent quality dessert pear, tree is highly resistant to fire blight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20 deg F. From Mississippi. 600 hours. Self-fruitful

Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Fuyu (Jiro) Persimmon Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

Giant Fuyu Persimmon Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful.

Candy Heart Pluerry™ Interspecific Plum - New for 2016 - Candy Heart, having Japanese plum and sweet cherry in its parentage, is a taste-test proven treat for fruit lovers. Its skin is dark speckled red, the amber/red flesh slightly subacid and very sweet, with a wonderfully unique flavor. This variety has an extended hang time, reaching peak ripeness around mid August in Central California. Pollenized by Sweet Treat Pluerry™ and Burgundy plum. (U.S. Plant Patent Pending) (Zaiger)

Sweet Treat Pluerry™ Interspecific Plum Sweet Treat is the first of its kind, the Pluerry™: a new fruit type from the genius of Floyd Zaiger. This taste-test favorite is a complex interspecific hybrid, predominantly of plum and cherry, combining the sweetness of a cherry with that summer fresh plum zing. Much larger than a cherry, this precocious and prolific variety will hang on the tree for over a month, and the colorful fruit make Sweet Treat a true ornamental. Tested as 46MB583. Harvest late June through July. Estimated chilling requirement 450 hours. Pollenizer required, Burgundy plum recommended. Patent Pending (Zaiger)

Emerald Beaut Plum One of the highest-rated plums in blind fruit tastings at DWN. Light green skin, greenish-yellow to orange freestone flesh. Harvest begins late August in Central CA. Ripe fruit continues to sweeten, becoming exceptionally sweet, but remaining crisp and crunchy. Ripe fruit holds on tree longer than any other stone fruit: two months or more! 600-700 hours. Pollenizer required: Beauty, Burgundy, Late Santa Rosa, Nubiana, Flavor King Pluot. (Pat. No. 9162) (Zaiger)

Late Santa Rosa Plum Medium to large, reddish-purple skin, red-streaked amber flesh. Tart-sweet with rich flavor when fully ripe. Harvest about one month after Santa Rosa. 400 hours or less. Self-fruitful.

Santa Rosa Plum Most popular plum in California & Arizona. Juicy, tangy and flavorful. Reddish purple skin, amber flesh tinged red. Late June in Central CA. 300 hours. Self-fruitful.

Satsuma Plum Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollenized by Santa Rosa or Beauty.

Flavor Supreme Pluot® Interspecific Plum Taste test winner. Plum/apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central CA, about two weeks before Santa Rosa. 700-800 hours. Pollenized by Santa Rosa and Late Santa Rosa plums, or Flavorosa, Flavor Queen and Geo Pride Pluot®. (Zaiger)

Eversweet Pomegranate Very sweet, virtually seedless fruit. (Even immature fruits are sweet.) Red skin, clear (non-staining) juice. Harvest late summer through fall. Coast or inland. 8-10 ft. arching shrub, or train as tree or espalier. Large, showy, orange-red flowers. 150 hours. Self fruitful.

Sweet Pomegranate Sweeter fruit than Wonderful, more widely adapted (better quality in cool-summer climates). Small, glossy-leaved, ornamental tree with showy orange-red blossoms in late spring. Very suitable to espalier and container growing. Harvest late summer. Unsplit ripe fruit stores in cool, dry place for two months or more. Very low chilling requirement, about 100 hours. Self-fruitful.

Misty Southern Highbush Blueberry Southern Highbush. Early season. In the West Misty is quite vigorous, growing very well on the coast and in the inland heat. This especially flavorful fruit does well in areas with chilling as low as 150 hours and all areas with mild winters and hot summers.

O'Neal Southern Highbush Blueberry Southern Highbush. Large fruit is especially sweet and flavorful. Early season. 5-6 ft. bush. 200 hours. Self-fruitful, but plant two varieties for largest crops.

Black Satin Blackberry Vigorous, very productive plant. Large berries. Midseason producer, July in most areas. Requires some support due to heavy cropping and limber, semi-trailing plant structure. USDA zones 6-9.

Canby Thornless Raspberry Thornless - the only red thornless raspberry. Large to very large fruit are firm, juicy and of fine flavor. Good for all uses. Viroid and aphid resistant. Very winter hardy, grows best in cooler summer areas. Harvest June, July. Self-fruitful, best in zones 4-9.

Fall Gold Raspberry Everbearing - Hybrid of Taylor X wild Korean mountain berry X Fall Red. Large to very large golden berries of excellent flavor. Extremely sweet and soft textured. Very adaptable and winter hardy. Harvest June through fall. Self-fruitful. Best in zones 4-11.

Heritage Raspberry Everbearing - Large, sweet, dark red berries. Mild flavor and excellent quality. Good for all uses. Moderate early crop in June, July. Heavier late crop August through fall. Berries keep well on or off the vine. Upright growth habit. Self-fruitful. Best in Zones 4-11.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA.
Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Olallieberry A cross between Youngberry and Loganberry, classified as a blackberry. Large, elongated fruit with unique sweet-tart flavor: a long-time California fruit stand favorite for fresh-eating, pies and jams. Vine-like (trailing) structure, requires support. Lower chilling requirement than Boysen. Takes up to two years to bear. Zones 7-9, possibly 6-10.

Goji Berry Bright red fruit used either fresh or dried. Contains the highest antioxidant level of any fruit type. Drought tolerant once established and very cold hardy. Self-fertile. USDA zone 5-9.

Chardonnay Grape For white burgundy wines. Small round berry. Best quality where summers are cool. Vigorous vine, Very cold hardy. 100 hours. Self-fruitful. Cane prune.

Cascade Hops Cascade and Centennial are the basic hops varieties grown for home brewing.

Centennial Hops Cascade and Centennial are the basic hops varieties grown for home brewing.

Tomuri Male Kiwi *Actinidia chinensis*, aka *A. deliciosa*. Pollenizer for Vincent female. Does not bear fruit. One male can pollinize up to eight Vincent females.

Vincent Female Kiwi *Actinidia chinensis*, aka *A. deliciosa*. Low chilling requirement, adapted to Southern CA. Tasty, well-regarded fuzzy-skinned fruit. Pollenized by Tomuri Male.

Dwarf Everbearing Mulberry *Morus sp.* 'Dwarf Everbearing' This bush form of mulberry continuously produces sweet blackberry-like fruit throughout the season. A great choice for container gardening, minor pruning will keep the plant compact. Mature height 6'-8' if grown in the ground. Widely adapted, self-fruitful. USDA zones 5-11.

Chandler Walnut Developed by U.C. Davis. Heavy bearing (bears on lateral buds, not just terminals like Hartley). High quality light-colored nuts. Smaller tree than Hartley, good choice for backyard walnut. Fall harvest. 700 hours. Self-fruitful.

Forest Pansy Redbud *Cercis canadensis* 'Forest Pansy' Striking scarlet-colored new foliage turning maroon then green as the leaves mature. Highly valued as a landscape accent. Swelling buds break pinkish-red along the bare branches, similar to Eastern redbud. Moderate grower to 20 ft. with a spreading habit. Sunset Zones 1-3, 7-20.

Western Redbud *Cercis occidentalis* Single or multi-trunked tree to 15 by 15 ft. Spectacular, bright purplish-pink sweet-pea-shaped flowers. Yellow to red fall color. Drought tolerant, resistant to oak root fungus. Sunset Zones 2-24.

Western Redbud, clump *Cercis occidentalis* Single or multi-trunked tree to 15 by 15 ft. Spectacular, bright purplish-pink sweet-pea-shaped flowers. Yellow to red fall color. Drought tolerant, resistant to oak root fungus. Sunset Zones 2-24. Clump form is a multi-trunked tree.
