

PHOTOGRAPHING YOUR FAMILY

The real life of a family unfolds in small moments—from big belly laughs to quiet snuggles, from everyday routines to shared adventures. Photographer Heidi Harf celebrates all the nuances of these interactions with a fun and relaxed documentary approach that bypasses stuffy poses and props in favor of real-life settings and honest interactions. For these sessions, Heidi becomes a happy part of your family and lets kids and parents simply be themselves. The result is images that are full of colorful personalities, real relationships, and the authentic life of a family—images that, even years from now, will bring you right back to the love you felt at this moment in your family's life.
