

High School Elite Scholars

At The Point we prepare our scholars for success in college and in the real world. In order to be successful, they must learn how to use technology for school, business, and life in general. Before graduating from The Point, all scholars will take at least one online course through North Carolina Virtual Schools.

Most of our scholars have taken two or more courses and are on the path to graduating early or attending GTCC for their junior or senior years.

9th Graders

All 9th graders in 2018 will take one course from August - December using an online format. This course is Earth and Environmental Science. Counselor Wade or Dean Johnson will be their advisor for the course to help them be successful.

10th Graders

All 10th graders have the **option** of taking an ACT Prep course online as an elective. This will prepare them for the PreACT and increase their chances of gaining entrance into the College and Career Program at GTCC. *We highly recommend that 10th graders who get the approval of their counselor register for this course.*

11th Graders

All 11th graders will take Personal Finance online, if they are not enrolled at GTCC. Personal Finance is required for graduation. They may enroll in this course in January 2019.

12th Graders

All 12th graders will take Physical Science online from August - December. This is required for graduation.

If your scholar is self-motivated and would like pursue other courses online, schedule a meeting with the school counselor. He/she must have a 3.0 or higher before registering for an extra online class.
