

In a partnership with [EWI](#), Innosphere and the City of Loveland are excited to offer you and your company this **free manufacturing entrepreneur training** held during national manufacturing week.

The event is open to Innosphere invited guests including engineering entrepreneurs, universities, companies and organizations, and advisors who would benefit from this guidance.

Technology to Market: Build4Scale Manufacturing Entrepreneur Training

Friday, October 6th, 2017 | 2:00 – 5:00pm

Location: EWI Colorado facility in Loveland

815 14th Street SW #D190 | Loveland, CO 80537

REGISTER NOW:

Two options: attendees can attend in person *or* via webinar.

Register here if attending in person (Loveland): http://bit.ly/EWI_Training

Webinar registration: <https://attendee.gotowebinar.com/register/8000537371251074818>

We're excited that this event will introduce key content from the "Build4Scale" training program being developed by a broad team of organizations and universities led by Lawrence Livermore National Laboratories and sponsored by the Department of Energy. The attached brochure provides high level overview of the program.

Brief Event Agenda:

2:00 – 2:20: Introduction of EWI and Innosphere

2:20 – 4:30: Selected Build4Scale Manufacturing Training

Introduction of the [Build4Scale](#) Program

Determining Market Feasibility

Design & Manufacture using Market Driven Reliability Goals

Scaling for the Production

Incorporating Field Quality & Voice of the Customer

4:30 – 5:00: Q&A and Interactive Feedback

5:00pm – ongoing: Drinks/Snacks/Networking

SPECIFIC GOALS: The full Build4Scale program includes a broad set of training content and tools (for on-line self-guided learning or classroom style instruction) to assist engineering startups who have working prototypes learn to prioritize and tackle manufacturing-related planning and execution challenges to avoid costly scale-up mistakes that can hinder success. This event will introduce the overall program and highlight it's potential uses through presentation of select content and participant interactions.
