

## AGENDA

### **7:30 – 8:30 am: Registration Opens / Networking Breakfast**

*Lobby in front of Claudio Grossman Hall*

### **8:30 – 9:30 am: Opening Plenary – The State of Cybersecurity Report – An In-Depth Review of the 2018 Report**

*Claudio Grossman Hall*

*Mary Blatch, Associate General Counsel & Director of Advocacy, Association of Corporate Counsel*

*Erika Brown Lee, Senior Vice President & Assistant General Counsel, Mastercard*

*Luis Diaz, General Counsel & Chief Cybersecurity Officer, Vision-e*

*Lily Lim, Director – Legal, Servicenow*

*This panel of subject matter experts will discuss the top cybersecurity trends and issues for in-house counsel, including data breach prevention and response, GDPR and the current policy debate around potential federal legislation in the United States. The panel will share their practical experiences as well as data from the 2018 State of Cybersecurity Report, a study conducted by the ACC Foundation.*

### **9:30 – 9:45 am: Networking Break**

### **9:45 am – 11:15 am: CONCURRENT EDUCATIONAL SESSIONS**

#### **#101 – Cyber Insurance Update: What is the Latest?**

**Room: NT01**

*Monique Ferraro, Cyber Counsel, The Hartford Steam Boiler Inspection and Insurance Co.*

*Karen Painter Randall, Partner & Certified Civil Trial Attorney, Chair, Cybersecurity & Data Privacy; Co-Chair, Professional Liability, Connell Foley LLP*

*Brian Conlin, Cyber Regional Manager, Starr Insurance Companies*

*Frederick Stein, Senior Vice President, General Counsel & Corporate Secretary, Redbox*

*Cyber insurance is no longer a strange new concept. It's now viewed by many companies as essential—the new normal. And they expect their vendors to have it, too. The areas seeing particularly rapid change and uncertainty are coverage for exposures relating to the European Union's General Data Protection Regulation (GDPR) and business interruption coverages. Addressing them can require a concerted effort because there are no standard "off the shelf" policies in this area. As a result, companies often pull resources not just from the finance or risk management departments, but also from IT and Legal. Our panelists will review some of the approaches and options.*

#### **#102 – Use of Artificial Intelligence in Fighting Cyber Attacks**

**Room: Y402**

*Andrea Bonime-Blanc, Founder & CEO, GEC Risk Advisory*

*Monica MacGregor, Managing Director, Berkeley Research Group, LLC*

*Pedro Pavon, Assistant General Counsel for Data Protection & Privacy, Honeywell International, Inc.*

*Casiya Thaniel, Attorney, Microsoft Corporation*

*Artificial Intelligence (AI) is not another tool revolutionizing the arsenal to combat cyber attacks. Through the ability for AI to detect abnormalities, malicious software, and attack vectors in real time, corporations can finally be a step-ahead of threats. However, AI also provides fertile ground for more sophisticated cyber attacks. How can your corporation best use AI to your advantage? In this session we will explore: How AI is being used as a valuable tool in Cybersecurity, risk management, and cyber protection, How AI is being used as a dangerous weapon. How corporations can best protect themselves from AI cyber attacks.*

### **11:15 am – 11:30 am: Networking Break**

## AGENDA

### 11:30 am – 12:45 pm: CONCURRENT EDUCATIONAL SESSIONS

#### **#201 – What to Do in a Ransomware Attack: A Table Top Exercise**

**Room: Y402**

Mary Chapin, Chief Legal Officer, Vice President & Corporate Secretary, National Student Clearinghouse

April Goff, Senior Counsel, J. C. Penney Corporation, Inc.

Roy Hadley, Jr., Special Counsel, Adams and Reese LLP

David Kilpatrick, Vice President Business Development & General Counsel, EnvironX Solutions, Inc.

*Although the role of in-house or outside counsel in a company's cybersecurity program differs from one company (or even one event) to the next, the key to success is a company that has routinely practiced how to deal with such events. The first half of this program will be devoted to a panel of experts to discuss the elements of a successful tabletop exercise. In the second half, the panel will lead the participants through a condensed, hands-on simulation of a realistic ransomware attack. This session assumes a basic to intermediate knowledge of cybersecurity programs and is best suited to those counsel who are familiar with, or exploring, implementing a cybersecurity incident response program.*

#### **#202 – The Current State of Privacy Legislation in the US and Abroad**

**Room: NT01**

Juan Argueta, Senior Counsel, SAP America, Inc.

Justin Antonipillai, CEO, WireWheel

Blake Nielsen, General Counsel & Vice President – Operations, Enfusion Systems

*The EU's General Data Privacy Regulation (GDPR) led the way. Then came a state law in Colorado and one in California. And lots of talk about possible federal legislation that could pre-empt those and any other state laws that may be in the works. Some companies aren't waiting. They've decided to adopt the most stringent standards on the theory that this will reduce internal headaches and boost customer confidence. The panel will compare and contrast the requirements of the various laws and weigh the likelihood of action in Washington.*

### 12:45 – 2:15 pm: Lunch Plenary:

**Claudio Grossman Hall**

**Keynote Address –** Leonard Bailey  
Special Counsel for National Security  
United States Department of Justice

#### **• How Do GC's Forge an Alliance with the CISO and the Board on Cybersecurity Issues?**

Katherine Adkins, Group Vice President, General Counsel & Secretary, Toyota Financial Services

Brian Campbell, Senior Vice President, Corporate Development & General Counsel, DHI Group, Inc.

Asha Muldro, Senior Managing Director & Deputy General Counsel, Guidepost Solutions LLC

Frederick Stein, Senior Vice President, General Counsel & Corporate Secretary, Redbox

*Cybersecurity is a team sport. The legal department must work cross-functionally with other corporate departments and the board is increasing its oversight of cybersecurity issues. This session will explore the relationship between the general counsel, the chief information security officer and the board and how these corporate leaders must navigate their company through the risks presented by cybersecurity and data privacy issues.*

### **2:15 – 2:30 pm: Networking Break**

## AGENDA

### 2:30 – 4:00 pm: CONCURRENT EDUCATIONAL SESSIONS

#### **#301 – Internet of Things: What Do Corporations Need to Know?**

**Room: Y402**

Antony Haynes, Director of Cybersecurity and Privacy Law, Albany Law School  
Asha Muldro, Senior Managing Director & Deputy General Counsel, Guidepost Solutions LLC  
Linda Sharp, Associate General Counsel, ZL Technologies  
Wendy Wu, Vice President & Senior Managing Director, Stroz Friedberg  
Marc M. Groman, Principal, GCLLC, Adjunct Professor, Georgetown University Law Center

*The rapid adoption of the Internet of Things (IoT) is here. Our watches, phones, printers, cars, and refrigerators are all getting smarter and interconnected. However, as we become increasingly reliant on web-based services and connected devices, we are also increasingly vulnerable to Cybersecurity threats and attacks. What is your corporation doing to be protected in this new frontier of IoT? In this session we will address: What are the major Cybersecurity risks of IoT for corporations? What can corporations do to mitigate against risks? What are lessons learned from recent cyber breaches involving IoT? What are the next ways for corporations to manage data privacy involving IoT? How do corporations use big data to their advantage with IoT? What corporate policies are trending with regard to IoT? How can GC's work with the CISO to manage IoT risks?*

#### **#302 – Beware of Vendor Vulnerabilities! Your Company is Liable for their Deficiencies**

**Room: NT01**

Alonzo Barber, Senior Counsel, Microsoft Corporation  
Krista Ellis, Head of Litigation, Crédit Agricole Corporate & Investment Bank  
Karen Hornbeck, Senior Manager, Consilio LLC  
Rosemary Kuperberg, Senior Global Privacy Counsel, Ellucian  
Jennifer K. Mailander, Deputy General Counsel Cybersecurity, Fannie Mae

*Organizations and their legal counsel are often challenged to keep up with an ever-changing landscape of regulations, laws, data security, privacy standards and mitigation strategies designed to protect against cyber-attacks and data breaches. This panel will bring together legal, data security and privacy professionals who are at the forefront of cutting-edge data security and privacy issues, as well as industry leaders who will provide valuable insight and practical experience on how to respond to constantly evolving cyber security threats. Attendees will learn from real world scenarios and obtain concrete take-aways to aid in understanding and navigating their organizations through the field of data and cyber security threats.*

### **4:00 – 4:15 pm: Networking Break**

#### **4:15 – 5:45 pm: Closing Plenary – Can Companies and the Government Really Work Together on Cybersecurity?**

**Claudio Grossman Hall**

Leonard Bailey, Special Counsel for National Security, United States Department of Justice  
Jacob Crisp, Director – Cybersecurity Policy, Microsoft Corporation  
David Hechler, Editor-in-Chief, CyberInsecurity News  
Erez Liebermann, Chief Counsel, Cybersecurity and Privacy, Vice President, Regulatory Law, Prudential Financial  
Greg Nojeim, Senior Counsel and Director, Freedom, Security & Technology Project, Center for Democracy and Technology  
Daniel Sutherland, Associate General Counsel, U.S. Department of Homeland Security  
Melanie Teplinsky, Adjunct Professor, American University Washington College of Law

*They each need help to counter the onslaught of threats, both domestic and international. And they have acknowledged that they can help each other. There have also been signs of progress. Congress even passed a law to encourage cooperation. But it hasn't accomplished very much, and it hasn't changed the way standoff. Companies fear losing business if they don't protect their customers' data. The government worries about the possible repercussions of sharing closely held intelligence—or failing to obtain crucial information that could prevent an attack (cyber or otherwise). Every so often the tensions break into the open, as when the FBI demanded that Apple break the encryption of the San Bernardino shooter's iPhone and the company refused. The panelists will review the progress that has been made, discuss the challenges that remain and consider possible resolutions.*

### **5:45 – 7:00 pm: Closing Networking Reception**

**The Atrium**
