- 🔥 Role of Authority having jurisdiction (AJH)

ConQuest
FLAMEBAR®
FIRE RATED HVAC SYSTEMS

Conquest Firespray offers code compliant fire-rated duct systems. Limiting the spread of fire and smoke through ventilation ducts is an essential life safety design requirement. This is best accomplished through the effective use of building compartmentation, and by using fire and smoke dampers within duct systems. With the use of Flamebar™ Fire-Rated Duct Systems, the ducts themselves offer the same degree of fire-rating as provided by walls or floors in the compartment.

Conquest Seminar Topics:

- 🔥 About Flamebar and Companies History
- 🔥 Applicable Code References and Review
- 🔥 Testing Standards, Requirements and Procedures
- 🔥 Design and Installation Options
- 🔥 Damper Offsets
- 🔥 Fan Enclosures
- 🔥 Brief Description and Design Options
- 🔥 Installation Steps
