

10,400

estimated households experienced homelessness in Alameda County in 2017*

System data point to the type of housing solution that could resolve a household's homelessness.

 = 100 people

3,300

could have been prevented from becoming homeless because they were living in rental housing, or with friends or family.

1,640

could have returned to housing using Housing Problem Solving, referrals, and one-time financial assistance

1,200

needed Rapid Re-Housing with rent subsidies for 6-24 m

2,560

needed deeply affordable units on a permanent basis because they had fixed disability/retirement income

1,700

needed Permanent Supportive Housing, which includes subsidized rent and support services

*According to the 2017 point in time count, 2.2% of the 5,629 people experiencing homelessness in Alameda County became homeless in the previous 7 days. This means that about 124 people became homeless each week in Alameda County. Multiplied by the number of weeks in a year, we estimate that 6,440 people in 5,545 households became homeless in Alameda County over the course of 2017. Combining the number of newly homeless with the already homeless: 6,440 new people + 5,629 people already homeless as of January 2017 = **12,069 total people in 10,400 households experienced homelessness annually.**
