

HUMANOID ----“TECHNOLOGY MET NECESSITY”

The day of content, pride and moment being blessed, the occasion when each and every GECT ians felt a privilege. Yes the dream come true event “HUMANOID” as the name speaks –‘where technology greets humanity’ conducted at Government engineering college Thrissur on 5th NOV 2016 by IEEE SB GEC Thrissur, SIGHT(special interest group for humanitarian technology) and RAS(Robotics Automation society) chapters in association with Alpha pain and palliative care unit- Thrissur, gave a golden feather to the crown of IEEE SB GEC THRISSUR.

The programme presided by GECT principal Dr.K P Indiradevi was granted with eminent persons like Mrs. Mini Ulanat(IEEE kochi subsection chair), Mr. Vijay S Paul(secretary IEEE kochi sub section), Sri Ajeesh Ummalath(senior physiotherapist), Dr Anandam Gopinath(chief medical officer) both of alpha pain and palliative care unit Thrissur. Prof.Joseph K D(Student branch counselor IEEE SB GECT) welcomed the dignitaries as well as off dais’s. The main part of the programme, project handover to Mr. Dasan father of Vishnudas (suffering muscular dystrophy) was witnessed with immense pleasure and feeling of satisfaction by the project makers such as Nived Johny(S7 ME- IEEE RAS chair), Shyam pradeep(S7 CSE) along with whole members who attended the function. Inauguration as well as the project handover was done by Mrs. Mini Ulanat. There was demonstration of the working of the customized wheel chair carried out by Mr.Nived johny and colleagues. Mr. Swaraj P (chair IEEE SB GECT,S7 ECE) gave the vote of thanks and was concluded by the inspirational talk handled by Mrs. Mini Ulanat and Mr. Vijay S Paul. The entire students were infact boosted up and was converted into a vibrant mode which they could keep up throughout their life after the session.

The afternoon session started off with a talk by Sri Ajeesh Ummalath which raised the enthusiasm of every first years towards IEEE. The talk was followed by a cheer up and energizing session of idea formation and presentation conducted by Haripriya (S5 ECE). Everyone of them were given task to find any one of the suffering sections of society and to put forward a project idea for uplifting them and help express themselves and to be more independent .This was followed by the most exciting part that is to make a prototype of the project using playcards. Everyone tried their best to make their model closely resemble their project idea. It was unbelievable for everyone that they could bring up an idea and implement it and was a realization on the real potential hidden inside the young minds .

Sure that the super powerful event had made every growing engineers to be unstoppable, to explore the needs of the underserved and to make use of the technical skills to bring up a multitude with better quality life . The programme came to an end by 4.30 but the journey towards building up a better society is in it's way with no boundaries no climax !!
