

Support STEM in our Community!

Become a Festival Ambassador to the USA Science & Engineering Festival!

We are proud to be an X-STEM school! The original team has graduated and we're looking for a new team! Many thanks to our alumni, **JoAnna Walker** and **Katie Soler**, who worked hard to earn this designation for our school!

This is not a large time commitment. I anticipate one or two after school meetings before the big event next April.

About the USA Science & Engineering Festival Ambassador Program

USA Science & Engineering Festival Ambassadors are a group of K-12 students, along with their parents and teachers, who support the Festival's mission by spreading the word about Festival programs and events in their communities. The Ambassador program (formerly the X-STEM School program) provides kids the opportunity to work together and gain valuable leadership, organizational and social skills, all while helping to increase public awareness of STEM in their own community.

Ambassador Role:

As an Ambassador, you and your fellow group members help to spread the word about USASEF programs in your community through:

- Social media posts promoting upcoming Festival events
- Hanging posters or flyers around your community promoting upcoming Festival events
- Sharing information about Festival events with other students, teachers and administrators at your school

Ambassador Benefits:

As a thank you, active Ambassadors will receive the following benefits:

- Free attendance at the annual X-STEM Symposium, our "TED-style" conference for middle and high school students (grades 6-12). Active Ambassador groups will receive up to 10 free seats at the annual X-STEM Symposium (seats are usually \$20/person!)
- Earn community service hours. You can track your hours worked from this site!

Please contact Kate O'Connor if you're interested in signing up: stem@stambroseschool.org.
