

Shelter Health Services in Charlotte brings real-time comprehensive diagnostic labs to the point-of-care. Comprehensive Metabolic Panel capability will be added within a month eliminating outsourcing labs and waiting a week or more for results or foregoing labs altogether due to time constraints for making decisions. One simple cartridge provides a wealth of diagnostic readings. One reading is Creatinine Clearance, important to our clients qualifying for PrEP, a daily HIV prevention pill. A \$10,000 grant bonus will fund the Piccolo Xpress Chemistry Analyzer from Abbott.
